Tiles

Made of elZinc® zinc-titanium (EN988 standard), they lend themselves to many styles of architecture, harmonising perfectly with the surrounding materials.

Whether for new-build or refurbishment projects, the elZinc range of four distinct tile designs are a great solution for wall cladding and for weathering roofs pitched over either 25° or 45°, depending on the designs chosen.

In addition to their ecological and aesthetic qualities, elZinc® tiles are:

- **Easy to install.**
- **Suitable for most projects.**
- **Highly corrosion resistant.**
- **Virtually maintenance free.**
