

# elZinc® direct-fixed shingles

elZinc® shingles combine the extraordinary properties of zinc along with designs that enable an easy installation and efficient response to different architectural, traditional and contemporary demands.

In addition to their ecological and aesthetic qualities, elZinc® shingles:

- Ensure the building's weathertightness in an optimal manner
- Adapt to practically every environment and project.
- Have high durability thanks to their great weather and corrosion resistance.
- Don't require any type of maintenance.

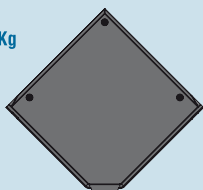

They are available on demand in every finish offered by elZinc:

- elZinc® Natural
- elZinc Slate®
- elZinc Rainbow® (Red, Blue, Green, Black, Gold and Brown)
